# Utica Metric Torque Click Wrenches

Introducing three new metric scale click wrenches from Utica.

You can trust Utica quality tools for your critical joints... These professional wrenches are designed for industrial applications where performance is crucial. Whether it's an application such as machine building, automotive assembly, aircraft assembly, or other assembly application, Utica torque tools are built to last.

In the current global business environment many companies have standardized on metric standards for critical joint applications.

## New Grip Feature

Utica metric torque wrenches feature a new comfort grip. The new grip allows the operator to work with more comfort and confidence. For extended use the grip reduces hand fatigue for increased productivity. Made of a synthetic polymer, the grip is resistant to most industrial oils and greases.

## Other Features

- Patented torque control mechanism provides a crisp "click" when the desired torque is achieved
- Torque setting is adjusted by rotating the handle

- Heavy-duty, reversible ratchet includes a quick-shift lever to allow easy single-hand shifting
- Includes custom molded plastic case to protect your quality Utica wrench when not in use

## Accuracy

Accuracy is +/- 4% of setting right hand (clockwise) and +/-6% of setting left hand (counter-clockwise) from 20-100% of rated capacity. Accuracy meets or exceeds ASME B107.14M and ISO 6789.

Patented spring-loaded locking collar locks the scale on the desired reading and remains in the locked position until reset by the operator.

## Calibration

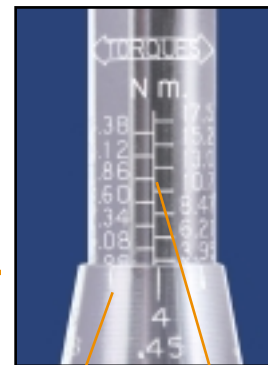

We now offer in-house calibration service for all types of Utica torque wrenches and screwdrivers. Standard turnaround time is five (5) days from receipt of tool. Let our trained Utica technicians re-calibrate your tools. All calibrations include an NIST-traceable certificate. Contact your local Utica representative.

## Utica Tools is on the web!
